

Environmental Policy

Ufinity is committed to reducing our environmental impact through responsible practices for our clients, team members and communities.

Our Environmental Policy Statement upholds our commitment to leadership, quality, sustainability and corporate and social responsibility and shape our actions and services to help support a healthier planet.

We are committed to continuous improvement in our environmental performance, reducing waste and pollution and using resources efficiently and responsibly, as well as compliance with all relevant legal and environmental requirements.

Our guiding principles include:

- Reducing fossil fuel consumption, water usage, and unnecessary waste.
- Using resources efficiently and continuously improving operations and efficiency.
- Consider environmental, economic, and equity in our decisions.

Our environmental policy reinforces our commitment to leadership, quality, sustainability and corporate responsibility in everything we do and offer.
